

#### James & Grace Lee Boggs School Water Sampling Lead Analysis Report

#### 1. INTRODUCTION

#### 1.1. GENERAL

This report presents the results of our water sampling performed at the site of James & Grace Lee Boggs School at 4141 Mitchell, Detroit MI., on June 8th, 2016. The sample results taken in conjunction with this investigation are also presented on Appendix 1.

#### 1.2. OBJECTIVES AND SCOPE

In general, the objectives of this investigation were to:

Accurately evaluate water outlets for lead above the EPA Maximum Contaminate Level (MCL).

#### 1.3. AUTHORIZATION

Authorization was provided by phone for our Professional Services by Amanda Rosman on May 25<sup>th</sup>, 2016.

#### 2. SITE INVESTIGATIONS

#### 2.1. FIELD PROGRAM

In order to sample and evaluate water, GSES took ten samples, a First Draw sample and a Flush sample, from five different locations on the site.

The field portion of our investigation was under control and continual supervision of an experienced member of our field scientist staff.

#### 2.2 LABORATORY TESTING

#### **2.2.1.** General

In accordance with ASTM D3559 and the U.S. Environmental Protection Agency guidelines for lead in drinking water at schools and child care facilities, we took two samples: first draw and flush, which is the required testing standard for drinking water lead contamination.

Results of the tests indicate that the water is below the threshold for lead contamination. A copy of the lab report and Chain of Custody is attached (Appendix 1).

#### 3. DISCUSSIONS AND RECOMMENDATIONS

#### 3.1. DISCUSSIONS OF FINDINGS

The water results are below the threshold for lead contamination.

We appreciate the opportunity of providing this service for you. If you have any questions concerning this report or require additional information, please do not hesitate to contact the undersigned.

Respectfully submitted,

Michael Etters Field Scientist Monica Starks, CIEC

Principal

Council-certified Indoor Environmental Consultant Board-awarded by the American Council for Accredited Certification

The results herein conform to TNI and ISO/IEC 17025:2005 standards, where applicable, unless otherwise narrated in the body of the report. The uncertainty of the test results are available upon request. All Dates and Times are reported as U.S. Eastern Time.

Any 'Level Detected' marked with an asterisk (\*) indicates that the value has exceeded the EPA Maximum Contaminant Level (MCL) or one of the Standards of Quality.

"ND"

This contaminant was not detected at or above our lower reporting limit (LRL)

"NA"

Not Analyzed

"Standard"

This column indicates either the Maximum Contaminant Level (MCL) for EPA Primary Standards or the guideline values for EPA

Secondary Standards

"LRL"

This column indicates the Lower Reporting Limit, which is the lowest level that the laboratory can detect a contaminant.

"DF"

This column indicates the contaminant dilution factor.

Report Notes:
